Automate Evolve

Process Automation for strategic data assets

Get faster processes and better data

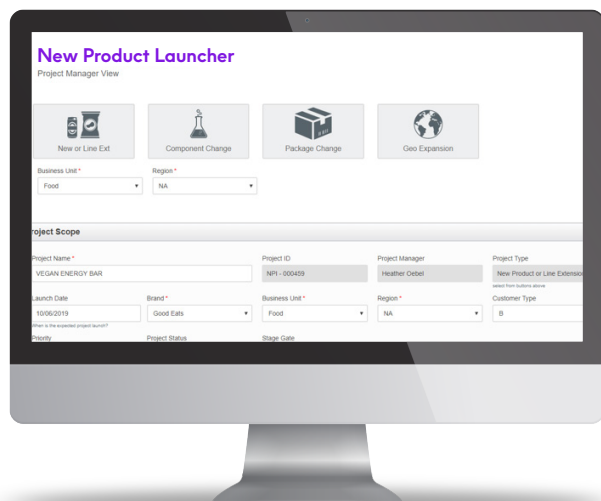

Precisely Automate Evolve is the only automation platform specifically designed to digitize strategic SAP data processes like product launches, customer and vendor onboarding, GL account setup, plant maintenance, and more.

Discover how this no-code, low-code platform enables you to drive results at scale, become more agile, and transform digital into a competitive advantage.

Match the speed of the digital economy

Digitizing critical business processes like manufacturing, supply chain, sales, and accounting is essential for survival today. But those processes rely on massive amounts of master data.

For your digitization efforts to succeed that master data must be available faster. It must be right, and the process for collecting that data both compliant and auditable. And this is what Automate Evolve enables you to do.

What's included

Automate Evolve brings together enterprise-grade automation, robust data stewardship, and deep SAP integration capabilities, with a no-code, low-code approach to solution design. This unique combination enables your organization to digitize strategic data processes faster and at scale—directly supporting your critical digital transformation initiatives.

Key Features

- Enterprise-grade workflow and automation
- Robust data stewardship
- Deep SAP integration
- No-code, low-code solution design

“The fact is that we’re getting to market much faster, and that means significant revenue recognition opportunities.”

Director, Master Data Organization
Reynolds Leveraged Services

How it works

Administrators

- Assign licenses, manage user rights, and define policies.
- Approve and manage content.
- View system and process dashboards and reports.
- Run process and data audits.

Business Authors

- Build automation solutions without needing SAP programming skills.
- View process dashboards and reports.

Business Users

- Use tailored, role-based web forms or Excel to input or approve data.
- View process dashboards and reports.

Why buy Automate Evolve

Get faster processes and better data

Choose the only platform designed to digitize strategic data processes.

Be more agile

Digitize fast and keep pace with a dynamic business landscape.

Make an impact at scale

Drive results and accelerate digital transformation across your business.

“It allows you so much flexibility to build in data governance, and route correctly to your business users. It provides business ownership capabilities that make the process very simple and allows users to easily get the work done on time.”

Data Integrity Manager,
Kellogg
